

## 13 • Laboratory Analysis Fees

Each PWS must pay for all samples collected under Subchapter F, and for compliance, new wells, wells that are contaminated and some UCMR monitoring. Region complaint samples and some investigative samples are paid by the TCEQ. The DWQ Team makes every attempt to minimize sampling costs to systems, while still ensuring that drinking water quality is adequately monitored. Prices are subject to change annually.

**Table 19: Current Laboratory Analysis Fees**

| Analysis Type   | DSHS<br>Effective<br>9/1/09 | LCRA<br>Effective<br>9/1/09 | OTHER  |
|---|-----------------------------|-----------------------------|--------|
| Metals  | \$ 264                      | \$ 264                      |        |
| Asbestos  | NA                          | NA                          | \$ 130 |
| Coliform (Fecal)  | \$ 40                       |                             |        |
| Coliform (Total)  | \$ 50                       |                             |        |
| Cyanide   | \$ 55                       | \$ 55                       |        |
| Diquat & Paraquat   | \$ 242                      | \$ 242                      |        |
| EDB / DBCP (504.1)  | \$ 105                      | \$ 105                      |        |
| Endothall   | \$ 357                      | \$ 357                      |        |
| Fluoride  | \$ 21                       | \$ 21                       |        |
| Glyphosate  | \$ 169                      | \$ 169                      |        |
| Haloacetic Acids (HAA5)   | \$ 230                      | \$ 230                      |        |
| Lead / Copper   | \$ 30                       | \$ 30                       |        |
| Mercury   | \$ 25                       | \$ 25                       |        |
| Metals Sample Preparation Fee   | \$ 25                       | \$ 25                       |        |
| Minerals  | \$ 155                      | \$ 155                      |        |
| Radionuclide - Gross Alpha and Beta (\$100) and Radium 228 (\$104) are conducted for all samples. Further testing will depend on these results. | \$ 204                      | NA                          |        |
| Radionuclide composite / storage fee  | \$ 15                       | NA                          |        |
| Radium 226  | \$ 76                       | NA                          |        |
| Radium 228  | \$ 104                      | NA                          |        |
| Single ICP Metal  | \$ 19                       | \$ 19                       |        |
| Single ICP-MS Metal   | \$ 25                       | \$ 25                       |        |
| SOC Method 515.4  | \$ 190                      | \$ 190                      |        |
| SOC Method 531.1  | \$ 180                      | \$ 180                      |        |
| SOC Group 5 (525.2, 508.1)  | \$ 300                      | \$ 300                      |        |
| PCBs  | \$ 293                      | \$ 293                      |        |
| Strontium - 89/90   | \$ 101                      | NA                          |        |
| Total Nitrate or Nitrate / Nitrite  | \$ 25                       | \$ 25                       |        |
| Total Organic Carbon  | \$ 43                       | \$ 43                       |        |
| Trihalomethanes (THM)   | \$ 84                       | \$ 84                       |        |
| Tritium   | \$ 51                       | NA                          |        |
| Turbidity   | \$ 20                       | \$ 20                       |        |
| Uranium Isotopes  | \$ 86                       | NA                          |        |
| VOC (524.2)   | \$ 183                      | \$ 183                      |        |
